43157

STUART. Originated in Jackson Co., Miss. One of the oldest and most extensively planted varieties and has proven a great commercial success. Nuts large and fill unusually well. You are safe in planting Stuarts for they have been very widely tested and are a vigorous and healthy grower.

SCHLEY. From Jackson Co., Miss. Nuts have extra thin shell, excellent flavor and rich quality. It is one of the best known and widely dissiminated varieties and commands the highest price of all paper shell pecans.

MONEYMAKER. From Madison Parish, La. Nuts of medium size, good quality and flavor. It is an early bearer. Very prolific and a very healthy and vigorous grower, and while it does not command the highest price, it makes up the difference with the number of pounds.

SUCCESS. From Jackson Co., Miss. A large nut of very fine flavor. This variety is a heavy bearer and we do not hesitate in recommending it as the best variety to be planted with the Stuart, Schley and Moneymaker for purposes of polination.

“BE SURE YOU ARE RIGHT, THEN GO AHEAD.”

Life is too short to be correcting mistakes in the planting of pecan trees.
